

CS23532-COMPUTER NETWORKS-LAB MANUAL

Practical -4

AIM: Setup and configure a LAN (Local area network) using a Switch and Ethernet cables in your lab.

The image shows a screenshot of the 'Internet Protocol Version 4 (TCP/IPv4) Properties' dialog box, specifically the 'General' tab. The dialog box has a title bar with a close button (X). Inside, there's a 'General' tab selected. Below the tab, there's a text box explaining that IP settings can be assigned automatically if the network supports it, or manually by asking the network administrator. There are two radio button options: 'Obtain an IP address automatically' (unselected) and 'Use the following IP address:' (selected). Under the selected option, there are three input fields: 'IP address:' with the value '10 . 1 . 1 . 1', 'Subnet mask:' with the value '255 . 255 . 255 . 0', and 'Default gateway:' with the value ' . . .'. Below these, there are two more radio button options: 'Obtain DNS server address automatically' (unselected) and 'Use the following DNS server addresses:' (selected). Under the selected option, there are two input fields: 'Preferred DNS server:' with the value ' . . . ' and 'Alternate DNS server:' with the value ' . . . '. At the bottom left, there is a checkbox 'Validate settings upon exit' which is unchecked. At the bottom right, there is an 'Advanced...' button. At the very bottom, there are 'OK' and 'Cancel' buttons.

Internet Protocol Version 4 (TCP/IPv4) Properties

General

You can get IP settings assigned automatically if your network supports this capability. Otherwise, you need to ask your network administrator for the appropriate IP settings.

☐ Obtain an IP address automatically

☒ Use the following IP address:

IP address: 10 . 1 . 1 . 1

Subnet mask: 255 . 255 . 255 . 0

Default gateway: . . .

☐ Obtain DNS server address automatically

☒ Use the following DNS server addresses:

Preferred DNS server: . . .

Alternate DNS server: . . .

☐ Validate settings upon exit

Advanced...

OK Cancel

Internet Protocol Version 4 (TCP/IPv4) Properties

General

You can get IP settings assigned automatically if your network supports this capability. Otherwise, you need to ask your network administrator for the appropriate IP settings.

☐ Obtain an IP address automatically

☒ Use the following IP address:

IP address:

10 . 1 . 1 . 2

Subnet mask:

255 . 255 . 255 . 0

Default gateway:

. . .

☐ Obtain DNS server address automatically

☒ Use the following DNS server addresses:

Preferred DNS server:

. . .

Alternate DNS server:

. . .

☐ Validate settings upon exit

Advanced...

OK

Cancel

Result :

Thus a lan connection has been established and files are shared through it
